SHOWERSCREENS

THE MARQUIS SELECTION OF  
QUALITY PIVOT SHOWERSCREENS

These days, pivot doors are the most popular choice in showerscreens, with good reason.

For a start they give you a wider opening than traditional sliding doors.

The clean uninterrupted expanse of glass makes them less obtrusive, especially with the slim, modern frames that are a feature of all Marquis showerscreens.

They are also quieter, and easier to clean.

Marquis doors pivot on stainless steel pins that provide great strength and simple, smooth operation. There are no other moving parts.

The aluminium frames come in a complete range of decorator colours in durable anodised and powdercoat finishes.

And with the introduction of its new stile and double pivot doors, Marquis now gives you even greater choice and flexibility in creating the perfect shower enclosure for your bathroom.

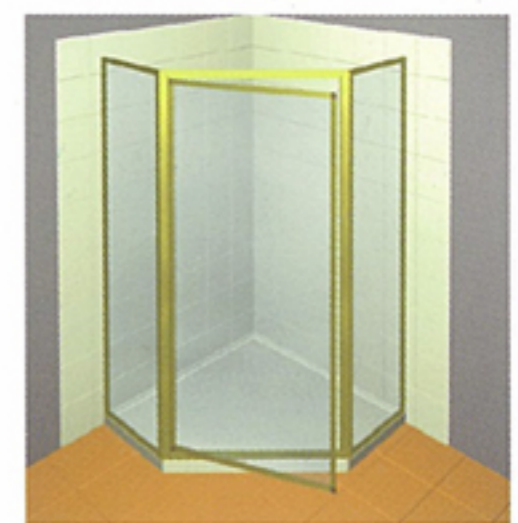

Front only

Front and return

Front and hob return

Corner enclosure

#### ABPIVOT

Full height magnetic strip gives positive closing and a watertight seal. An intergrated full length handle is also available.

#### STILE PIVOT

Door pivots from the jamb and swings in or out. Gives extra clearance for taps, or simply a different look, and features modern rounded extrusions.

#### DOUBLE PIVOT

Ideal for confined spaces with a double door that opens in or out. Also features modern rounded extrusions.
